

Data Analysis report on ***Emerging Trends and skills*** in global IT sector

Mr. Aniket Prabhavalikar
19th September, 2022

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Global IT business has become competitive
- IT business firms need to identify the trends and skills in terms of
 - Programming Languages in demand
 - Desired Databases to store data
 - Web Framework trends
- Keeping up with the pace of growing IT field has become a challenge
- Data analysis is the way to understand the bigger picture
- Sources to extract data are Training portals, job postings and surveys
- Insightful findings help in predicting future trends and changing technologies

INTRODUCTION

- **Data** is extracted from **various sources**
- The number of job openings using the **GitHub Jobs API** for technologies like Java, Python, MySQL, C++, C# etc.
- **Web scraped an HTML page** for annual salary offered based on programming language
- **Stack Overflow Developer Survey 2019** dataset includes current programming languages, Databases, Web frameworks and data about the desired trends in future
- Stack overflow developer **survey** was taken globally **with people from various countries, educational backgrounds, Gender and age**

INTRODUCTION

Analyzing the data and identify insights and trends include the following:

- What are the top programming languages in demand?
- What are the top database skills in demand?
- What are the popular IDEs?

METHODOLOGY

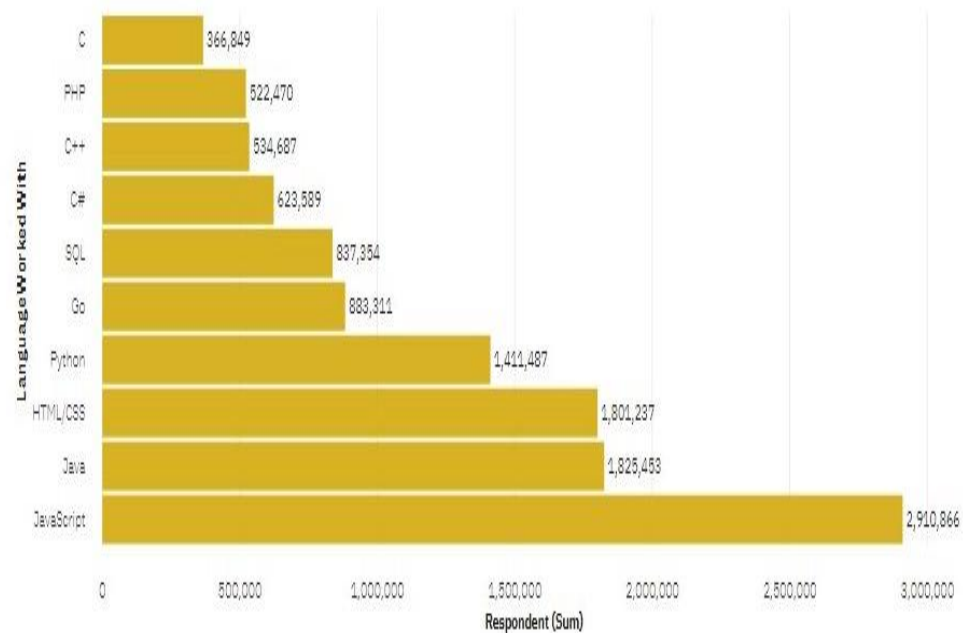

- **Data collection** from the various sources
- **Data cleaning** is done to identify any missing values in the data
- Missing values or blank values are been **normalized to analyze data** on a common ground level
- Data is analyzed to identify **correlation between factors through graphs, plots and statistical methods**
- A dashboard is created using **IBM COGNOS to present current trends and desired trends** for programming languages, Databases, Web Frameworks
- **Demographic details** are also tabulated for a global perspective

PROGRAMMING LANGUAGE TRENDS

Current Year

Top 10 LanguageWorkedWith

Next Year

Top 10 LanguageDesireNextYear

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- **“JavaScript” is the most preferred language**
- **“Python” & “HTML CSS” are popular and desired Languages**
- **“TypeScript”, “Bash/Shell/Powershell” are the desired languages in future**

Implications

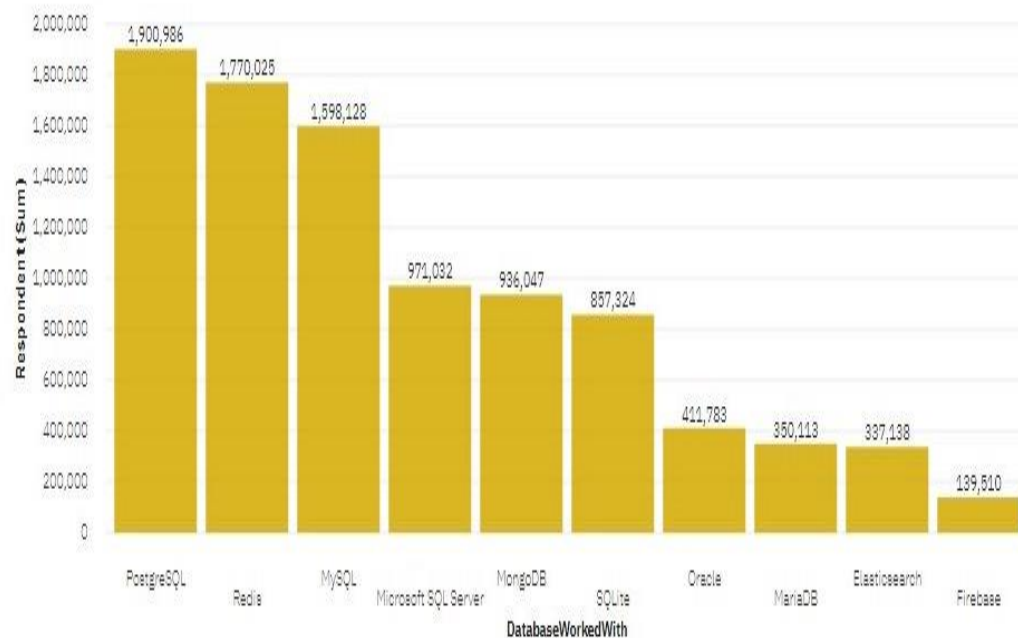

- **Most of the applications will use “JavaScript” as a major language for development**
- **There will be systems working with “TypeScript” and “Bash/Shell/Powershell” languages in future**
- **“Python” & “HTML CSS” will continue to gain popularity among developers**

DATABASE TRENDS

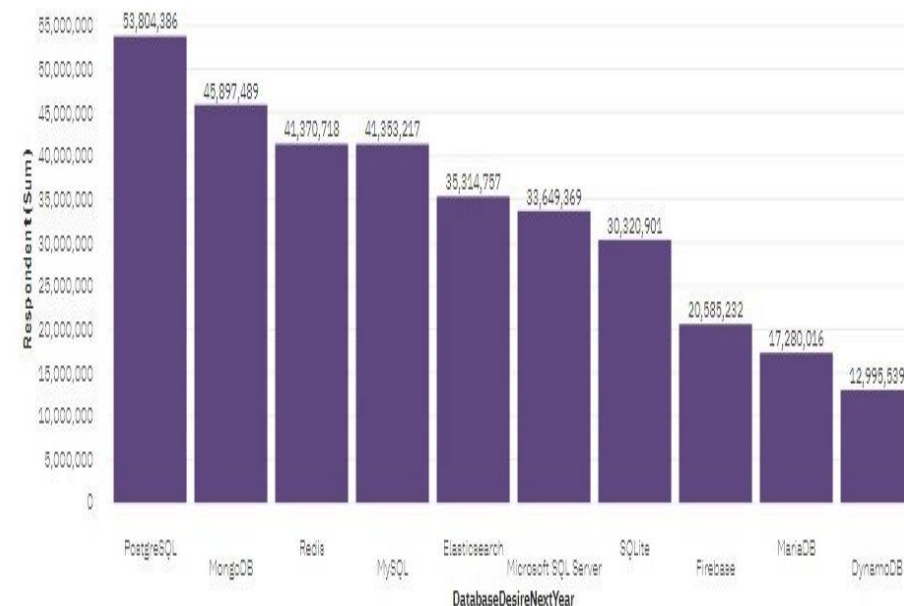

Current Year

Next Year

Top 10 DatabaseWorkedWith

Top 10 DatabaseDesireNextYear

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- “PostgreSQL”, “Radia”, “MongoDB”, “MySQL” remain popular amongst developers
- Developers / Users prefer “MariaDB”, “DynamoDB” over “Oracle”

Implications

- It is required to increase the capacity of the popular databases to continue leveraging the services
- “Oracle” will be the least used database in coming years

DASHBOARD

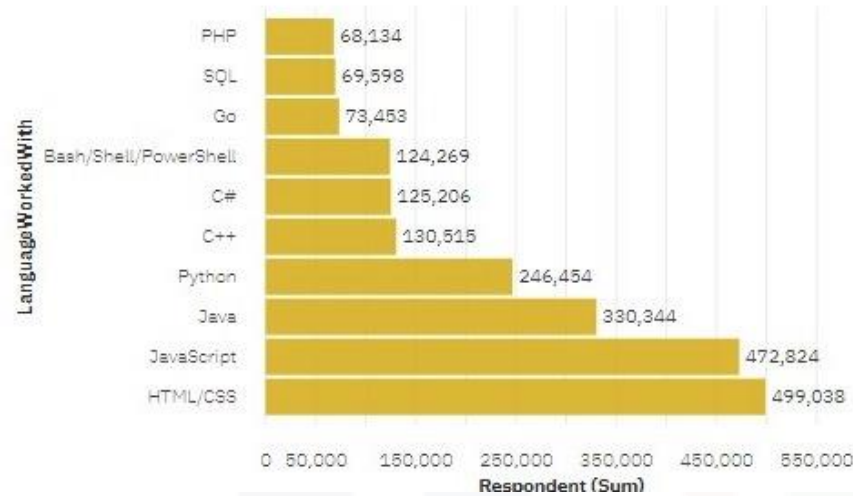

<https://jptok.dataplatform.cloud.ibm.com/dashboards/d56ad883-f7be-4ec7-a772-7ab3953fed0c/view/013cd57604ae0cdf56bcb5e407cb79052f61210bb4bbd703d3867b495b317297a83b4299c8794b0e88110c32a2ed120ac0>

DASHBOARD TAB 3

Tab 1 Current Technology Usage Future Technology Trend **Demographics** +

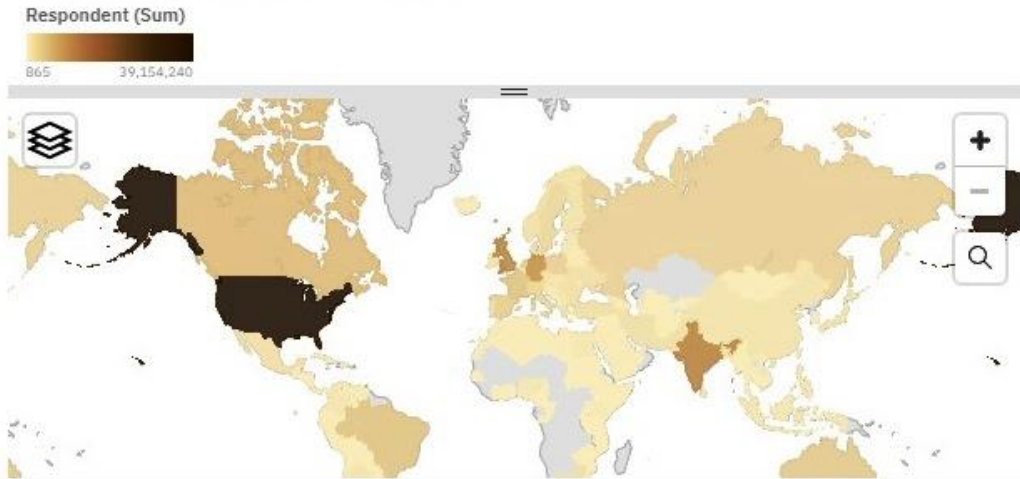

Respondent classified by Gender

Gender

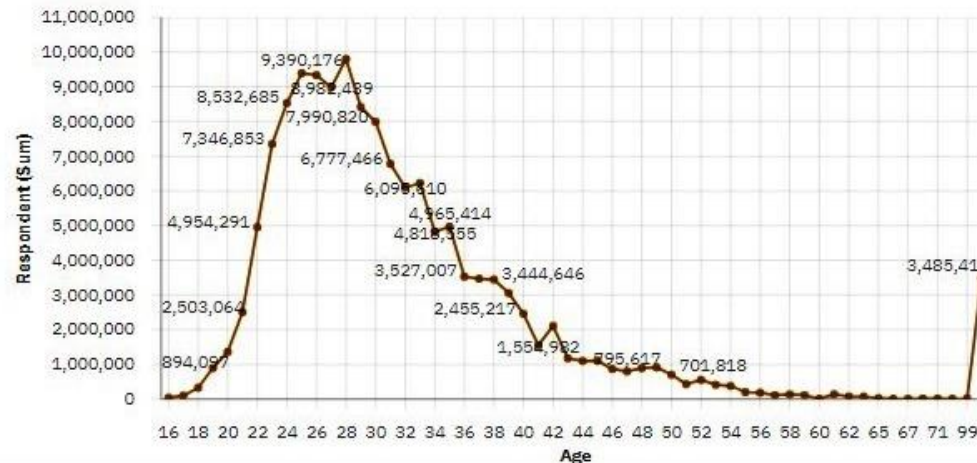

- Woman;Man;Non-binary, genderqueer, or gender non-conforming
- Woman;Man
- Woman;Non-binary, genderqueer, or gender non-conforming
- Man;Non-binary, genderqueer, or gender non-conforming
- Non-binary, genderqueer, or gender non-conforming
- Woman
- Man

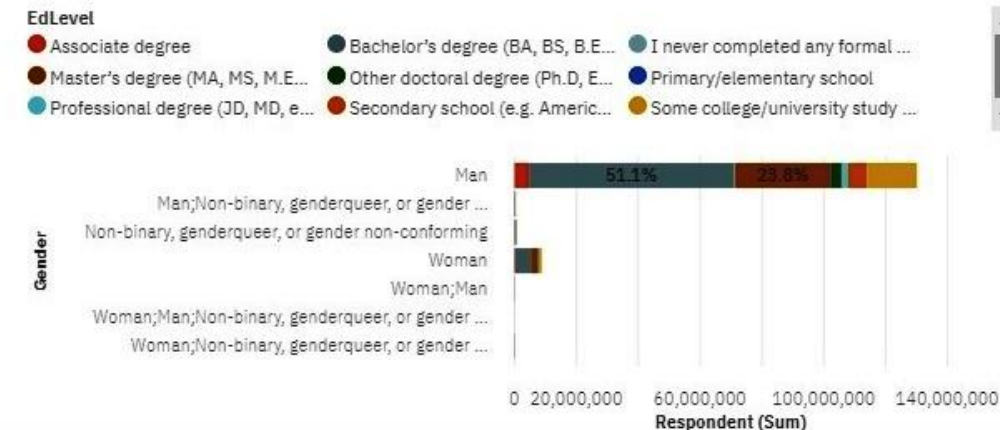

Respondent Count for Countries

Respondent Count by Age

Respondent Count by Gender, classified by Formal Education Level

DISCUSSION

Parameter	Popular Language/ DB / Web framework	2 nd Highest	3 rd Highest
Highest Paid Job	Swift (\$130,801 per year)	Python (\$114,383 per year)	JavaScript (\$110,981 per year)
Most Desired DB in the coming years	PostgreSQL	Radia	MySQL
Most Desired Programming Language in coming years	Javascript	Python	HTML/CSS

OVERALL FINDINGS & IMPLICATIONS

Findings

- “Python” & “Javascript” are the most popular programming languages
- “PostgreSQL”, “MySQL” & “Radia” are popular databases
- “React.js” & “Vue.js” are the most desired web frameworks in market

Implications

- IT firms will hire employees with better programming skills in ‘Python’, ‘JavaScript’
- IT companies will focus on employees having skills with handling databases like ‘PostgreSQL’, ‘MySQL’ & ‘Radia’

CONCLUSION

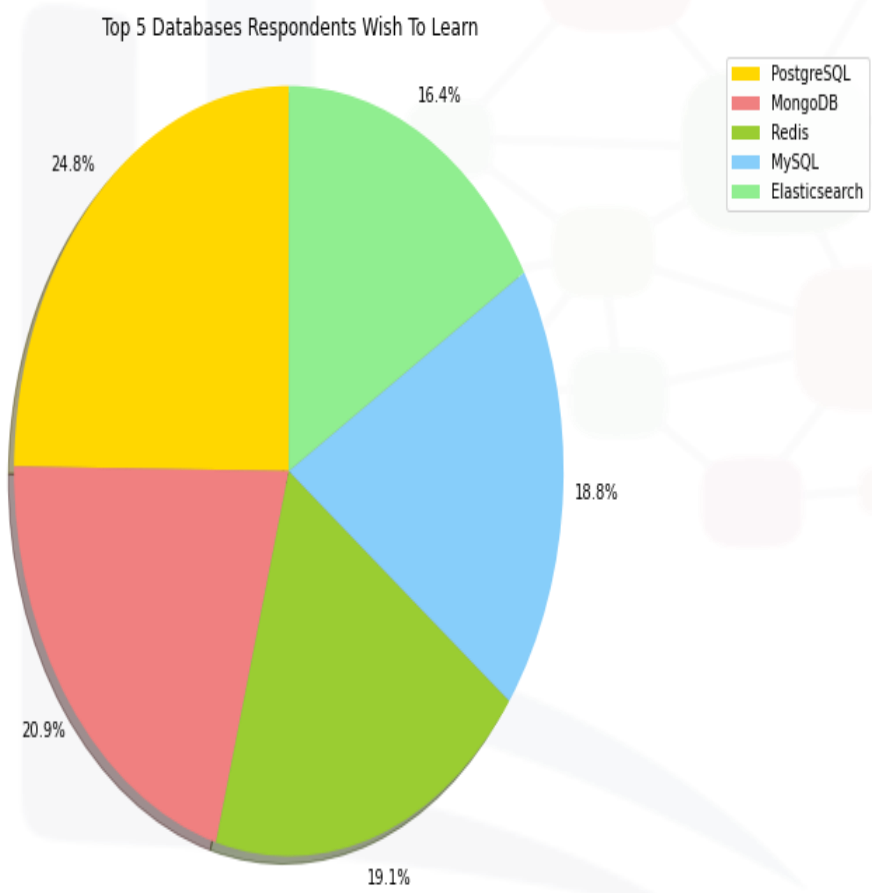

- Most of the **applications developed** in IT industries as well as IT systems run globally **prefer “Python”, “Javascript”**
- Developers having skills in **“Python” and “Javascript” are most paid in jobs**
- **“Swift”** is the most **emerging language in market** with lucrative job salary

APPENDIX

- Language-----→Average Annual Salary
- Python----->\$114,383
- Java----->\$101,013
- R----->\$92,037
- Javascript----->\$110,981
- Swift----->\$130,801
- C++----->\$113,865
- C#----->\$88,726
- PHP----->\$84,727
- SQL----->\$84,793
- Go----->\$94,082

Appendix

Language	Number of Job Openings
C	13498
C#	333
C++	305
Java	2609
JavaScript	355
Python	1173
Scala	33
Oracle	784
SQL Server	250
PostgreSQL	10
MongoDB	174
